Advanced Mechanical Enterprises/AME to Showcase Windrock's New 6400 Diesel Engine Analyzer at the 2016 International Workboat Show/IWBS

Fort Lauderdale, FL - November 23, 2016 - For the eighth year in a row Advanced Mechanical Enterprises/AME will be showcasing at the International Workboat Show/IWBS. The International WorkBoat Show is the largest commercial marine tradeshow in North America serving people and businesses working on the coastal, inland, and offshore waters.

AME will also be showcasing an array of services and products they provide and distribute, including Wartsila PSE shaft seals and Envirosafe Composite Bearing material. To coincide with Windrock's recent launch of their new 6400 Diesel Engine Analyzer, a model will be on display for viewing. Operators, mechanics and engineers worldwide rely on Windrock diagnostic solutions to increase reliability, improve performance and reduce engine failures of diesel engines in industrial applications. Most importantly, it provides better, more usable data and diagnostics to improve the analysis and performance measurement of reciprocating engines and compressors.

"We are very excited about the new 6400 analyzer platform. With its complete new design, smart sensor technology and integrated wireless, it also incorporates the 20+ years of Windrock expertise in designing and manufacturing portable analyzers. It is designed for our customers and partners such as AME to allow them to get the most out of their diesel engine analysis programs," said Ed Kelleher, Global Business Development Manager-Diesel, Windrock.

"We look forward to IWBS every year," said AME President, Rich Merhige. "When it comes to the commercial marine industry, this is the main show. This is a great time for us to bring new technology and products to this segment of our client base. Windrock had huge success in the oil fields, providing cost effective predictive and preventative maintenance. We saw the immediate value it could bring to the workboat sector in a very similar way."

ABOUT ADVANCED MECHANICAL ENTERPRISES

AMESolutions.com is comprised of [Advanced Mechanical Enterprises/AME](#) and [Advanced Maintenance Engineering/AME](#), comprehensive marine and industrial engineering services companies specializing in Predictive, Preventative and Corrective Maintenance for rotating machinery. Since 1992, AME has pioneered the use of the most cutting-edge technologies and state-of-the-art equipment to the diagnostics, maintenance and repair of rotating machinery, particularly for private and commercial vessels. AME is recognized as an external specialist for condition monitoring by the American Bureau of Shipping/ABS and is commissioned by clients the world over to solve complex vibration issues on everything from yachts, workboats, pumping stations, power plants, industrial/manufacturing facilities, and residential and commercial buildings, among other entities. AME is a proud authorized representative for Windrock and authorized distributor of Wartsila seals, and bearings for the state of Florida. Based in Ft. Lauderdale, with multiple locations near international airports, AME offers 24-hour, worldwide service.
